

## MINDGRAPE & TLUX TECHNOLOGIES signs exclusive partnership agreement regarding Training services within the Nordic Region

*Stockholm, - Feb 15, 2021 - The Nordic Flexera distributor Mindgrape AB signs partnership agreement with the Flexera/Revenera exclusive training partner TLUX Technologies, for the purpose of offering Flexera training services within Sweden, Finland, Norway, Denmark and Iceland*

Mindgrape, based out of Stockholm, Sweden, has been a value-added distributor of software licenses, consultancy services and related training within the area of IT-infrastructure and IT-security since 2006. Their ability to define and realize a comprehensive strategy for Application Delivery and Platform Management makes Mindgrape a unique player in the Nordic IT market. Since Mindgrape already serves as the official Flexera software distributor for the Application Readiness, Installation and Software Vulnerability Management product portfolios, adding related high level product training is a natural add-on and next step.

TLUX Technologies, based out of London, UK and Ulm, Germany, is the official global training and consulting partner of Flexera/Revenera. They are also responsible for the management of a global network of certified training partners on Flexera's products such as AdminStudio, InstallShield and Workflow Manager. TLUX's heritage comes from decades of working with industry leaders such as InstallShield and Flexera and also has core technology expertise including MSI/X, InstallShield, AdminStudio, application virtualisation and deployment technologies, update and patching best practice as well as Flexera's Workflow Manager suite and Office365 migrations.

Having been founded in 2015 by former EMEA Flexera Professional Services Director Crispin Luxton and Thabo Khobo, who has over 20years experience growing and executing several services businesses in the German-speaking market and beyond – TLUX is further growing its partnership network.

As a result of this partnership, Mindgrape together with TLUX Technologies, will now be able to offer first-class up to date training courses on the Flexera AdminStudio and Installation products for customers based in the Nordic region. The training is delivered on a state of the art virtual training-platform, which enables the participants to join no matter what location within the Nordics.
